

Bare Minimum Requirements

These requirements must be satisfied before any points are awarded. Failing to meet these requirements will result in a 10% deduction for each infraction.

1. Project follows upload instructions correctly to include naming conventions and directory formats.
2. Project has been styled to create a unique look and feel for this project. Project does not appear to be half-baked.
3. Project uses VALID HTML and CSS.
4. Non-responsive sites are scored as a ZERO!!!

CATEGORY	% OF TOTAL	EXCELLENT	GOOD	FAIR	POOR
Part 1		100	75	30	0
HTML	10	1. Page uses HTML5 doctype 2. HTML documents include the correct meta-viewport tag, closed correctly. 3. All code is properly indented and well formatted. 4. Shorthand is used when possible. 5. Section dividers are created and code is well commented.	All but 1 of the page requirements were presented	All but 2 of the page requirements were presented	MORE THAN TWO of the page requirements were NOT presented
Site Requirements	25	1. Nav bar made with floated items 2. Call to Action 3. Photo gallery with 6-12 images 4. Video player 5. Table 6. Form 7. Nav links each page together	All but 1 of the page requirements were presented	All but 2 of the page requirements were presented	MORE THAN TWO of the page requirements were NOT presented
CSS	40	1. The stylesheet is well organized and CSS is cleanly and efficiently written making effective use of the Cascade. 2. There are no redundant rules. 3. All code is properly indented and well formatted. 4. Shorthand is used when possible. 5. Section dividers are created and code is well commented. 6. The values for all pixel (px) based widths, left and right margins, and left and right padding have been converted to percentages (%) to create a fluid layout. 7. CSS was modified to include three (3) media queries required for desktop, tablet and mobile phone device and browser dimensions but no more than five (5). 8. Each media query contains no less than three CSS rules necessary to modify content for each device screen and browser dimension specified. 9. Media is appropriately scaled and reduced in size using responsive web design techniques. 10. Headers, lists, and paragraphs are appropriately scaled and reduced in size using media queries for each device screen and browser dimension specified using responsive web design techniques 11. Presentational graphics and icons have been removed from the presentation for mobile portrait device screen and browse dimensions 12. Site has a usable mobile aesthetic 13. Entire project is done by hand. No framework used. Use of framework results in a total point loss for this category.	All but 1 of the page requirements were presented	All but 2 of the page requirements were presented	MORE THAN TWO of the page requirements were NOT presented
Transition/Transform Requirements	10	1. Transitions used to include property, duration, delay, and timing function 2. Transforms present 3. Scale, rotate, and skew present	All but 1 of the page requirements were presented	All but 2 of the page requirements were presented	MORE THAN TWO of the page requirements were NOT presented
Form Requirements	15	1. All form field elements have border-width and color set for each side 2. All form elements have width 3. Focus pseudo-class is given to all inputs when user has focus 4. Buttons styled beyond defaults 5. Buttons have a hover or active state 6. HTML5 attributes included	All but 1 of the page requirements were presented	All but 2 of the page requirements were presented	MORE THAN TWO of the page requirements were NOT presented and/or missing step 8.
Your Professionalism score is calculated based on the completeness of all assignments and assessments.
